

OLAC: Accessing the World's Language Resources

Steven Bird

CSSE, University of Melbourne

LDC, University of Pennsylvania

Gary Simons

SIL International

Graduate Institute of Applied Linguistics

Who is involved in OLAC?

1. Aboriginal Studies Electronic Data Archive
2. Academia Sinica
3. African Language Materials Archive
4. Alaska Native Language Center
5. Archive of Indigenous Languages of Latin America
6. Audio Archive of Linguistic Fieldwork (UC Berkeley)
7. ATILF_Resources
8. Centre de Ressources pour la Description de l'Oral
9. CHILDES_Data Repository
10. Comparative Corpus of Spoken Portuguese
11. Cornell Language Acquisition Laboratory
12. DOBES catalogue (MPI, Nijmegen)
13. Ethnologue: Languages of the World
14. European Language Resources Association
15. Laboratoire Parole et Langage
16. Linguistic Data Consortium Corpus Catalog
17. LINGUIST List Language Resources
18. Natural Language Software Registry
19. Online Database of Interlinear Text (ODIN)

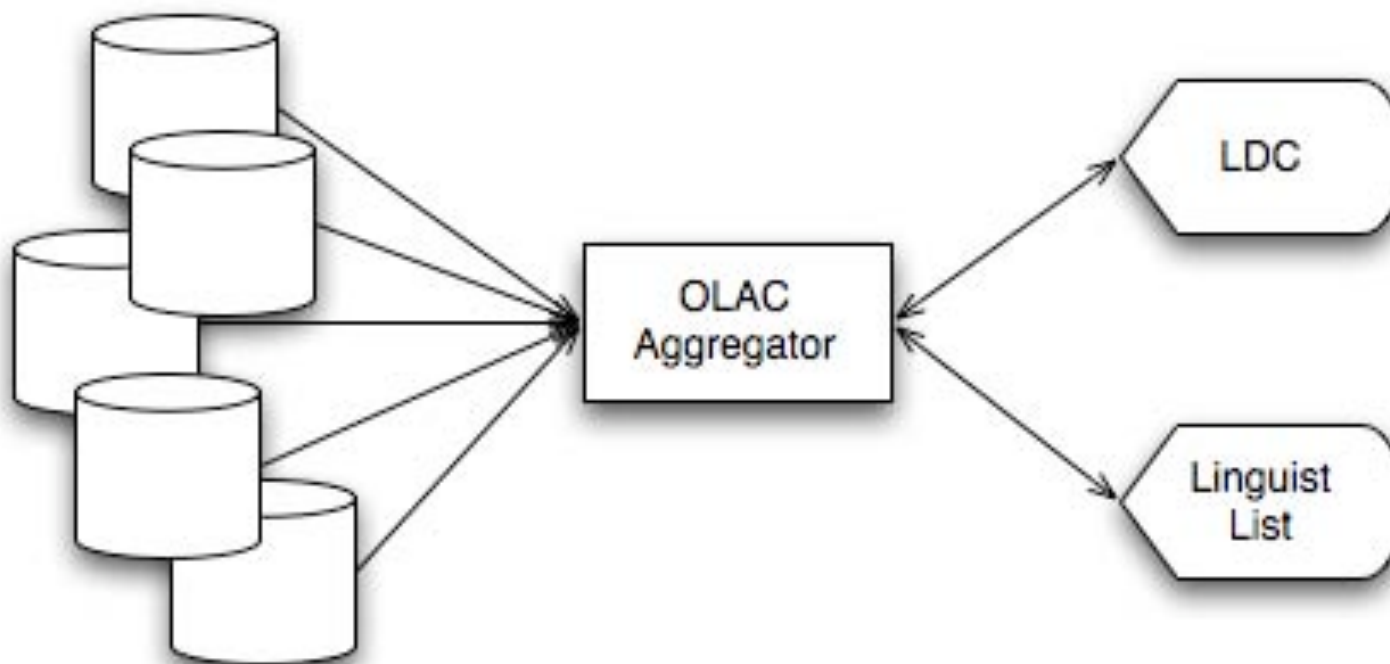

20. Oxford Text Archive
21. PARADISEC
22. Perseus Digital Library
23. Research Papers in Computational Linguistics
24. Rosetta Project 1000 Language Archive
25. SIL Language and Culture Archives
26. Surrey Morphology Group Databases
27. Survey for California and Other Indian Languages
28. TalkBank Data Repository
29. Tibetan and Himalayan Digital Library
30. Typological Database Project
31. University of Bielefeld Language Archive
32. Virtual Kiyardild Archive (Melbourne)

How does OLAC work?

1. Archives submit catalogs
in a standard format

2. Central index is
updated every 8 hours

3. Accessed via
search services

How does OLAC Metadata relate to Dublin Core?

- OLAC has extended Dublin Core metadata by providing additional descriptors tailored to language resources:
 - Subject language
 - Linguistic type
 - Linguistic field
 - Discourse type
 - Role

Search

OLAC Coverage in Relation to Language Size

<i>Population range</i>	<i>Languages</i>	<i>In OLAC</i>		<i>Items</i>
10,000,000 or more	83	82	99%	3,341
1,000,000 to 9,999,999	264	223	84%	1,431
100,000 to 999,999	892	575	64%	2,607
1,000 to 99,999	3,746	1,797	48%	9,012
100 to 999	1,071	392	37%	2,305
1 to 99	548	271	49%	832
Unknown	308	86	28%	307
<i>All living languages</i>	<i>6,912</i>	<i>3,426</i>	<i>50%</i>	<i>19,835</i>
Extinct languages	602	130	22%	315

Online Resources in Relation to Language Size

<i>Population range</i>	<i>Languages</i>	<i>In OLAC</i>		<i>Items</i>
10,000,000 or more	83	75	90%	426
1,000,000 to 9,999,999	264	174	66%	312
100,000 to 999,999	892	342	38%	501
1,000 to 99,999	3,746	929	25%	1,167
100 to 999	1,071	140	13%	194
1 to 99	548	95	17%	147
Unknown	308	27	9%	33
<i>All living languages</i>	<i>6,912</i>	<i>1,782</i>	<i>26%</i>	<i>2,780</i>
Extinct languages	602	34	6%	53

Current Issues and Ongoing Development

- Three shortcomings
 - metadata quality
 - participation
 - digitisation projects
- Broader Challenges
 - searching for language resources on the web
 - library catalogues and the deep web
 - discovering OLAC
- NSF Project: “OLAC : Accessing the World’s Language Resources”
 - 1.improve access to resources in language archives
 - 2.improve access to language resources on the web

Conclusion

- OLAC has a functioning infrastructure that allows our community to index and discover endangered language documentation
- We need to encourage every institution with endangered language resources to participate so that the catalog can be complete
- We could enhance standards for resource description to support metrics for summarising the extent of documentation for a language

OLAC Documents

This index lists all documents that are current within the OLAC document process. They are listed by type. See also [OLAC documents by status](#) and [OLAC documents by date](#), which include documents that have been retired or withdrawn.

[Standards](#)

OLAC Standards specify how the Open Language Archives Community operates.

[Recommendations](#)

OLAC Recommendations express the consensus of members of the Open Language Archives Community regarding various aspects of language resource archiving.

[Notes](#)

OLAC Notes offer background information and helps for implementors of language archives.

N.B. See the [OLAC Process](#) document for an explanation of the document types, status levels, and review process.

Standards

[OLAC Metadata](#) [2008-05-31]

Candidate Standard. This document defines the format used by the Open Language Archives Community OLAC for the interchange of metadata within the framework of the Open Archives Initiative OAI. The metadata set is based on the complete set of Dublin Core metadata terms DCMT, but the format allows for the use of extensions to express community-specific qualifiers.

[OLAC Metadata](#) [2006-04-05]

Standard. This document defines the format used by the Open Language Archives Community OLAC for the interchange of metadata within the framework of the Open Archives Initiative OAI. The metadata set is based on the complete set of Dublin Core metadata terms DCMT, but the format allows for the use of extensions to express community-specific qualifiers.

[OLAC Process](#) [2006-04-05]

Standard. This document summarizes the governing ideas of OLAC (i.e. the purpose, vision, and core values) and then describes how OLAC is organized and how it operates.

Archive Details

Pacific And Regional Archive for Digital Sources in Endangered Cultures (PARADISEC)

Size	5656
Repository Name	Pacific And Regional Archive for Digital Sources in Endangered Cultures (PARADISEC)
Institution	A consortium made up of the University of Melbourne, University of Sydney, Australian National University and the University of New Engl
ArchiveURL	http://paradisec.org.au
Location	Project Director based at the Department of Linguistics, University of Sydney, Transient Building, F12 University of Sydney, NSW 2006. Pr Linguistics and Applied Linguistics, University of Melbourne, Victoria 3010, Australia
Short Location	Melbourne, Sydney, Canberra, Armidale, Australia
Synopsis	PARADISEC (Pacific And Regional Archive for Digital Sources in Endangered Cultures) offers a facility for digital conservation and access the Pacific region, defined broadly to include Oceania and East and South east Asia. Only 5078 of the items listed here are currently digiti assessment of the scope of work that needs to be digitised. They also make otherwise inaccessible material discoverable.
Access	The current focus of PARADISEC is securing endangered materials. Access to the datastore is by password and is currently only available http://www.paradisec.org.au/repository/[CollectionID]/[ItemID] . Page images of some fieldnotes can be located online.
Administrator	thien@unimelb.edu.au
Participants	Linda Barwick (Project Director), Nick Thieberger (Project Manager)
Base URL	http://azoulay.arts.usyd.edu.au/paradisec/PDSC-DR.php
Repository ID	paradisec.org.au
